1. The following is an examiner's statement of reasons for allowance: the closest prior art, newly cited Yamamoto et al (USPN 6,217,996) teaches an aromatic polyimide film and its composite sheet comprising an aromatic polyimide core or solid film having high rigidity and low linear expansion coefficient wherein the solid film can be surface treated with a coupling agent such as a silane coupling agent, and one or both surfaces of the aromatic polyimide core film can be coated with a thin polyimide adhesive coating having a thickness of 0.1 to 10 microns formed by applying a polyimide precursor solution. Yamamoto et al teach that the precursor solution gives a polyimide having a glass transition temperature of 180°C to 260°C to exhibit adhesiveness at an elevated temperature, wherein preferred polyimide precursor is prepared from a two-component combination of an aromatic tetracarboxylic acid component and an aromatic diamine containing 3 or more benzene rings in its molecular structure, such as a combination of 2,3,3',4'-biphenyltetracarboxylic dianhydride and 1,3-bis(4-aminophenoxy)benzene (TPER). Yamamoto et al further teach example composites having a tensile modulus of about 7.65 GPa and a linear expansion coefficient of about $1.3 \times 10^{-5}/^{\circ}\text{C}$. However, Yamamoto et al do not teach or fairly suggest utilizing p-phenylenediamine or 4,4'-diaminodiphenyl ether as the diamine component for the polyimide adhesive coating, particularly given that both are not diamines containing 3 or more benzene rings and further given that the instantly claimed "highly heat-resistant amorphous polyimide" is understood by the Examiner as an amorphous polyimide having a glass transition temperature of 300°C or above or not observed at a temperature below 300°C, as noted in paragraph 0038 of the specification. Further, it is noted that the X reference in the International Search Report dated 6/17/05, namely EP 0 538 075, also fails to teach the

claimed invention given that the adhesive polyimide film taught by the reference is formed from more than two components as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Monique R. Jackson whose telephone number is 571-272-1508. The examiner can normally be reached on Mondays-Thursdays, 10:00AM-5:00PM.
